You must present your appointment letter, your passport and a visa-style photograph of each applicant to the examining physician, radiologist and laboratory technician for identification purposes.

The procedure consists of a physical examination (all applicants), chest x-ray (applicants 15 or older), and vaccines (if necessary). Do not bring the x-ray to your visa interview. Keep it as part of your permanent medical file. If you immigrate, pack the x-ray in your luggage.

The doctor's consultation fees (in Guyanese dollars) should not exceed the schedule outlined below:

- Applicants under 15 years of age - G\$8,000.00
- Applicants 15 years of age and older – G\$18,000.00

The schedule above does not include the cost of necessary vaccinations, which are subject to local pricing and availability. The estimated cost of vaccinations is provided below. You may submit clinic cards for review by the panel physician, and if certain vaccinations are not required, this will result in an overall cost reduction.

Vaccination Estimate

Age Group	Maximum fee/ GY\$
Less than 12 months	6000 (doctor's consultation fee only, no investigation nor vaccine required)
12 months to less than 2 years	\$29,000

Please be prepared to pay the physician's fee in cash. If the doctor refers you for further tests or consultations, you will be responsible for any additional costs incurred.
